

CAN CAN
SERVICES

Powering Your Projects with Skill and Trust

ABOUT US

Established in 2025 by long-term friends **Keith Morris** and **Nathan Golden**, **Can Can Services** is built on a **partnership that spans more than 30 years** and is **founded on trust, shared values, and a passion for the electrical industry**. As **NICEIC Approved Contractors**, the business operates to the highest industry standards, ensuring all electrical work is fully compliant, safe, and independently assessed.

Keith brings over 27 years of experience, including **six years as a Senior Project Manager** with leading UK M&E contractors, as well as **three years as joint owner of a Fire and Security business**, where he gained valuable insight into running and delivering complex projects.

Nathan adds more than 22 years of industry experience, having also been a **joint owner of both a Fire and Security business** and a multi-discipline Electrical contracting company delivering projects across the UK.

Together, they **lead a highly skilled and diverse workforce**—from SMSTS-qualified site supervisors to first-year apprentices—ensuring every project is supported by strong leadership, technical expertise, and a genuine commitment to quality, safety, and customer satisfaction.

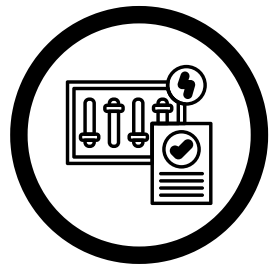

WHY US?

We deliver high-quality, reliable electrical and security solutions, backed by hands-on experience managing complex projects from start to finish.

- **Proven Project Expertise:** We have completed projects ranging from full electrical installations, including first-fix primary containment, cable trays, and main intake panels, to second-fix wiring, testing, and certification.
- **End-to-End Capability:** From full electrical design to installation, we handle every stage of a project, including trunking, conduits, power outlets, lighting, heating, and AC systems.
- **Attention to Detail:** Our work includes precise installation of lighting control systems and structured wiring, ensuring every system is safe, functional, and fully tested before handover.
- **Track Record of Reliability:** Projects completed within tight timeframes, which demonstrates our ability to plan, execute, and deliver on schedule without compromising quality.
- **Skilled, Hands-On Team:** Our team, led by experienced directors Keith and Nathan, combines technical knowledge with practical installation experience to ensure projects are executed efficiently and professionally.

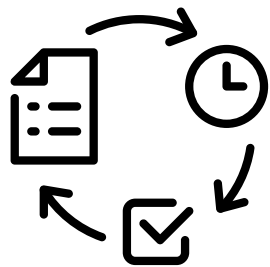

OUR SERVICES

Electrical Installations

Comprehensive electrical solutions for residential, commercial, and industrial projects.

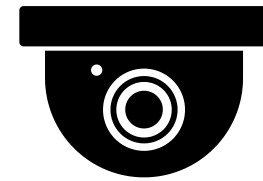

Project management

Expert oversight from planning to completion, ensuring projects are delivered on time and within budget.

Fire Alarm Systems

Design, installation, and maintenance of reliable fire detection and alarm systems.

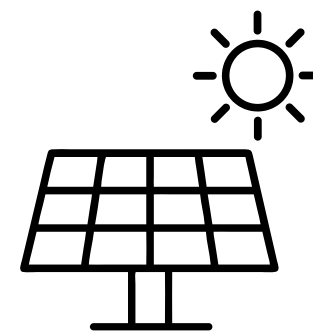

CCTV Solutions

Advanced surveillance systems for enhanced security and monitoring.

Security systems

Complete security solutions, including access control and intruder detection.

Photovoltaic (PV) & Solar Installations

Efficient solar energy systems designed and installed to maximize performance and sustainability.

PROJECT GALLERY: Mapesbury School

Location: London

Project Value: £195k

Duration: 12 months

We delivered a full electrical design and installation project for a Specialist Autism and ASC and SEMH School, ensuring a safe, functional, and efficient environment for staff and students. The scope included the installation of primary cable baskets within ceiling voids, a lighting control system for teaching classrooms, and comprehensive wiring for heating and AC supplies. All second-fix work was completed with precision, followed by thorough testing and certification to guarantee compliance with industry standards. The project was executed with careful attention to the unique requirements of a special needs educational setting, prioritising reliability, safety, and ease of use.

PROJECT GALLERY:

Croft Medical Centre

Location: Eastergate

Project Value: £150k

Duration: 10 Months

We completed a full electrical installation for a medical centre, delivering a safe, efficient, and fully compliant electrical system.

The project included the installation of galvanised trunking and bracketry within ceiling voids, as well as galvanised conduits within walls for small power and lighting circuits. Comprehensive wiring of all power outlets was carried out, followed by second-fix installation, thorough testing, and full certification upon completion. The project was executed with meticulous attention to detail to ensure reliability, safety, and seamless operation in a medical environment.

PROJECT GALLERY: Caraway House Care Home

Location: Chichester

Project Value: £375k

Duration: 14 months.

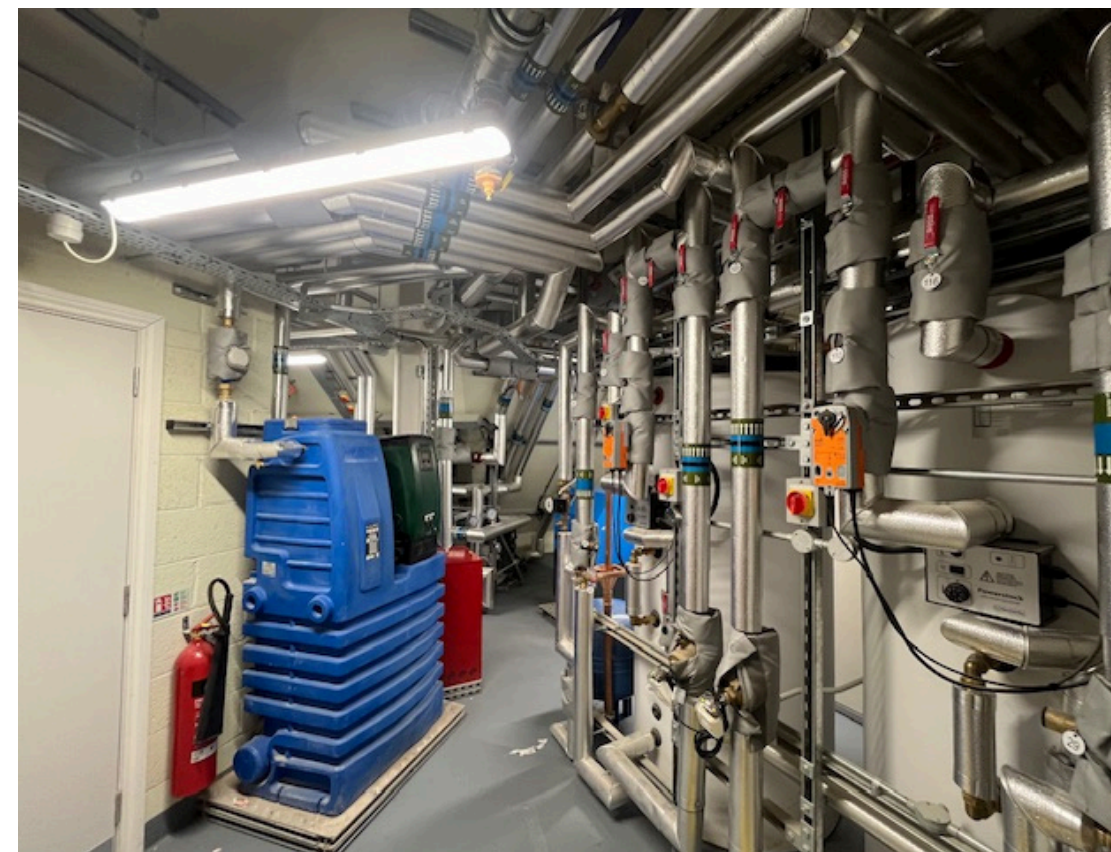

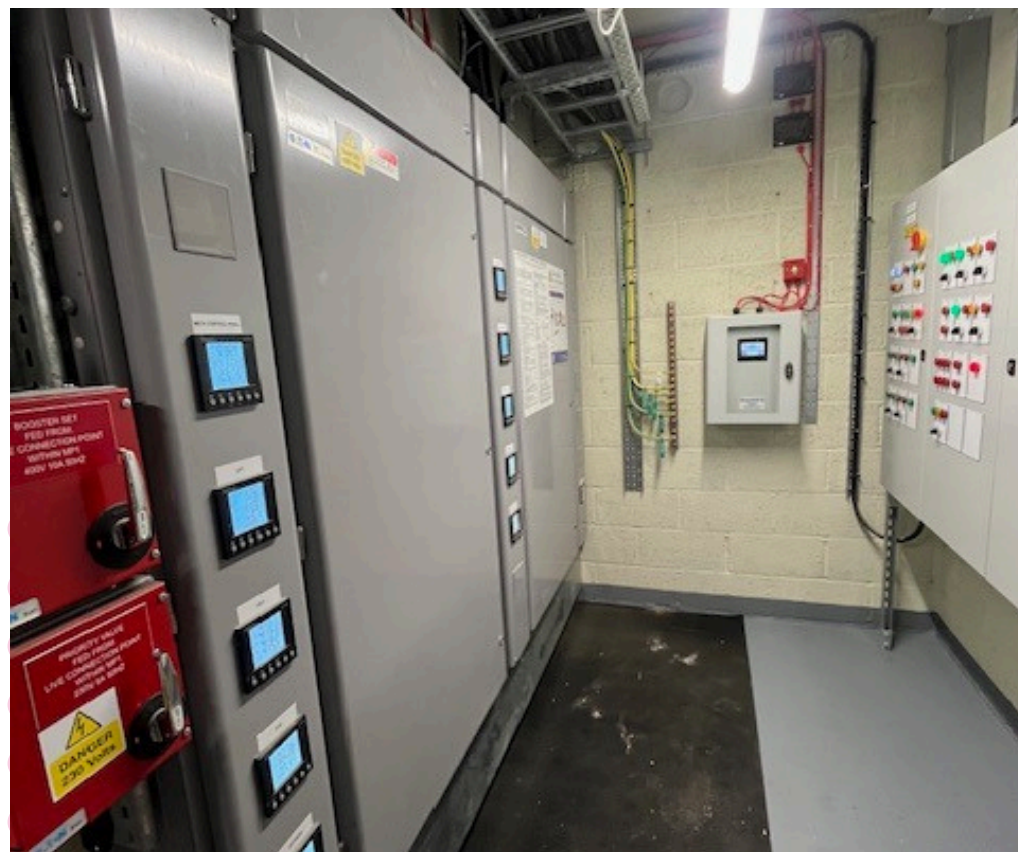

We successfully completed a full electrical installation for a care home, encompassing all stages from first-fix to commissioning. The scope included the installation of primary containment, galvanised cable trays, and PVC conduit, as well as the main electrical intake MCCB panel and associated sub-mains. Full wiring throughout the premises was carried out, followed by second-fix installation, testing, and certification to ensure compliance with all relevant standards. The project was delivered efficiently, with careful attention to safety, functionality, and the specific operational requirements of a care home environment.
